This year, we offer a carefully selected list of iris best suited for the home garden, and a list of outstanding new varieties.

OUR 1952 INTRODUCTION

GOLD DUST (Formerly Seedling No. 33-48a). It has been our ambition for years to produce a really new, outstanding plicata in shades of deep yellow and gold, that will hold its colors. We deem it a privilege to offer this beautiful new iris, and feel confident that it will rank with the best new varieties.

Blooms are of good size with fine form and texture. They are beautifully poised on nicely branched 36 inch stems. Both standards and falls are rich golden yellow, flushed and dotted deep brown. Excellent growing habits and good increaser. A number of our garden visitors last year placed this on their "want list." We have a fairly good stock, which permits of a moderate introductory price.
